KINDER CORNER

When asked about their favorite part of our first park day, Evelyn said that she liked the picnic because she didn't remember ever having one before. Declan liked climbing on the play structure after we ate. Kammie liked playing Lava Monster, who happened to be Mr. Alex. Kayden said she liked the entire afternoon!

FIRST FEATURES

During P.E., Finn practiced pitching and we were both impressed when he slid to catch a ball that I threw. Caden said the walk to the park was his favorite. When we head out, we stay in the "sandwich". Mr. Alex and I are the beginning and end of the line which makes us the bread. The students are the meat, lettuce, cheese, tomato, etc.

OUR CLASS CONSTITUTION

We asked the question, "How can we create rules for our classroom to learn in a safe and fun environment?" We learned about God's 10 Commandments, the difference between rules and laws, how to be a super citizen, and how a bill becomes a law in our government. Then we thought up lots of rules, voted on them, and created "Our Class Constitution" which every student signed.

EXTRA CURRICULARS

Every afternoon, we finish the day with a fun activity. On Mondays, we conduct a science experiment. We learned that every action has a reaction. Then we tied a balloon to a string and blew it to the other side of the room. On Tuesdays, we do an art project. We learned about Paul Cezanne and painted a basket of apples. On Wednesdays, Mr. Alex teaches music. We learned rhythms by reading notes and rests. Then we learned about wind, string, and percussion instruments while Mr. Alex demonstrated the guitar, ukulele, violin, trumpet, recorder, accordion, a djembe drum from Uganda, and an ocarina from Japan. (His piano was too heavy to bring downstairs.) We always end the music lesson with a fun song while Mr. Alex leads us with his ukulele or guitar. On Thursdays, we have P.E. while we are at the park. We played "Volcanoes and Ice Cream Cones" and then started learning 4-Square with two people and two squares. The week before, we practiced throwing tennis balls and catching them with a cone. We will continue to build on skills so that we can play complete games soon. We finish the week with "Fun Friday" where students get to play games or build with Legos or some other fun activity while we open the Discovery Store. Students can use the Super Tickets that they have been earning all week to buy something cool.
