

My Cheetah Report

By Evelyn

Introduce the animal.

Would you like
to know about
cheetahs? They

A re so FAST!

Where does it live?

They live in

Africa.

What is the habitat like?

Grasslands are

large, flat

areas with lots

of grass and

a few bushes and

trees

What does it eat?

Cheetahs are

carnivores. They

eat antelope and

other smaller

animals.

Who are the predators?

Lions are the

main predator for

the cheetahs

What about the baby?

A baby cheetah
is called a cub
They are born

with a strip

of fur laid down

their backs

that is called

a mantle.

Did you know?

Did you know that
cheetahs are the
fastest land animal?

They can run up
to 70 miles per
hour. That is the
same as a car
on the freeway!

Every cheetah has
different spot
patterns. Their

spots help them

hide in the tall

grass so they can

hunt their food.

Now you know...

As you can see,

there is a lot

to know about.
